INSTRUCTIONS FOR USING VORTEX INSIGHT

STEP 1: Select the UTC Time Zone under which observations have been measured

STEP 2: Prepare the observations in the following format and requirements:

1) There should be no header information in the observations file

2) Each line should be in this format if the observations are wind measurements:

YYYYMMDD HHMM Wind Speed (m/s):

20140522 1100 9.86
20140522 1200 10.2
(…)

Or this format if the observations are production values:

YYYYMMDD HHMM Power (KWh):

20140522 1000 5356.3
20140522 1100 6087.2
(…)

3) There is no need for any decimal numbers. That is, the observations can be uploaded with none, one, two or three decimals.

4) Each of the lines must contain 3 columns. If a single line contains just 2 values, please delete the affected line.

5) Missing values are considered as: 99, 999, -99, -999.

6) Observations should be at least 11 months long for the algorithm to properly work.

7) Observations can be 10 minute, 30 minute or hourly data.

STEP 3: Upload the file and press Request

STEP 4: Wait for the confirmation e-mail and download the site adapted series

STEP 5: Download the site adapted series by using your Vortex account
